

November 15-16, 2025 Kyoto, Japan

The 3rd International Conference on Bioprocess and Sustainability (ICBS2025)

Organized by

Supported by

Preface

On behalf of the International Society of Bioprocesses and Sustainability (ISBS), I am delighted to extend a warm welcome to all participants of the 3rd International Conference on Bioprocess and Sustainability (ICBS2025). This event will be held from November 15-18, 2025, at the International Conference Halls of Kyoto University's Clock Tower, set in the picturesque city of Kyoto, Japan. We are excited to have you with us for this significant occasion, which promises to be an extraordinary convergence of individuals committed to advancing biotechnology and sustainability.

The ISBS was founded with the aim of nurturing talent in the realms of biotechnology and sustainability. Our organization is dedicated to promoting the exchange of innovative technical knowledge and equipping skilled professionals who can meet the dynamic demands of the industry. We strive to make a meaningful impact on the development of waste and wastewater reclamation practices that foster a circular economy, not just in Japan and Asia, but on a global scale. This flagship conference series, ICBS, provides a vital platform for experts across various disciplines to share their most important research outcomes and engage in insightful discussions regarding the future of sustainable practices. Throughout the upcoming days, you will have the chance to listen to prominent researchers, engage in stimulating sessions, and discover innovative solutions that can address the human resource gaps faced by both academia and industry.

I would like to express my sincere appreciation to our co-organizers and sponsors, whose invaluable support has made this conference a reality. To all attendees, thank you for your presence and your commitment to the pursuit of knowledge and innovation. Your participation enhances our discussions and contributes to our shared goal of achieving a more sustainable future. I encourage you to fully engage with the diverse programs we have organized, including the two-day excursion and field survey, which will offer unique perspectives on the practical applications of our discussions. Lastly, I want to acknowledge the hard work of our teams at Kyoto University, University of Tsukuba, and other partner institutions. This conference would not have been possible without your dedication and effort.

Once again, welcome, and I hope you enjoy the conference!

Duu-Jong Lee

Chairman, International Society of Bioprocesses and Sustainability (ISBS)

14th November 2025

١

Schedule

18:00 (JST), 14th November (Fri) 2025 End of Registration

15th November (Sat) ~ 16th November (Sun) 2025 Conference days

17th November (Mon) ~ 18th November (Tue) 2025 Field excursion (applicable)

Organizer

International Society of Bioprocess and Sustainability (ISBS)

Co-organizers

Kyoto University, Japan

University of Tsukuba, Japan

Organization Committee

Executive Committee

Chair: Dr. Noguchi, Ryozo: Professor, Kyoto University, Japan

Vice chair: Dr. Hidaka, Taira: Associate Professor, Kyoto University, Japan

Vice chair: Dr. Lee, Duu-Jong: Professor, City University of Hong Kong, China

Vice chair: Dr. Lei, Zhongfang: Professor, University of Tsukuba, Japan

General affairs: Dr. Yuan, Tian: Assistant Professor, University of Tsukuba, Japan

Supporters

The Japanese Society of Agricultural Machinery and Food Engineering (JSAM)

University of Tsukuba Research Unit Colloid Engineering in Bio-resources

Sponsors

Faculty/Graduate School of Agriculture, Kyoto University, Japan

Kurita Water and Environmental Science Foundation

Worldwide Universities Network (WUN) Research Development Fund

Japan Science and Technology Agency (JST)

JST Africa-Japan Collaborative Research (AJ-CORE)

Members

- Dr. Adachi, Yasuhisa: Emeritus Professor, University of Tsukuba, Japan
- Dr. Cao, Guohua, President, Green Tech Co., Ltd, Japan
- Dr. Chen, Nan: Professor, China University of Geosciences (Beijing), China
- Dr. Hao, Liting: Associate Professor, University of Civil Engineering and Architecture, China
- Dr. Hidaka, Taira: Associate Professor, Kyoto University, Japan
- Dr. Huang, Weiwei: Professor, Hainan University, China
- Dr. Huang, Wenli: Associate Professor, Nankai University, China
- Dr. Ihara, Ikko: Professor, Kobe University, Japan
- Dr. Ito, Ayana: Assistant Professor, Kyoto University, Japan
- Dr. Lee, Duu-Jong: Professor, City University of Hong Kong, China
- Dr. Lei, Zhongfang: Professor, University of Tsukuba, Japan
- Dr. Li, Jie: Associate Professor, Shanghai University, China
- Dr. Li, Miao: Professor, Tsinghua University, China
- Dr. Li, Shuhong: Associate Professor, Tianjin University of Science and Technology, China
- Dr. Liu, Chunguang: Professor, Shandong University, China
- Dr. Miyasaka, Juro: Assistant Professor, Kyoto University, Japan
- Dr. Noguchi, Ryozo: Professor, Kyoto University, Japan
- Dr. Nguyen, Thu Huong: Postdoctoral Researcher, Kyoto University, Japan
- Dr. Ohdoi, Katsuaki: Assistant Professor, Kyoto University, Japan
- Dr. Otsuka, Toshihiko: Assistant Professor, Toyo University, Japan
- Dr. Pan, Shu-Yuan: Associate Professor, National Taiwan University, Taiwan

- Dr. Qian, Xiaoyong: Professor, Shanghai Academy of Environmental Sciences, China
- Dr. Shimizu, Kazuya: Professor, Toyo University, Japan
- Dr. Toyofuku, Masanori: Associate Professor, University of Tsukuba, Japan
- Dr. Utsumi, Motoo: Professor, University of Tsukuba, Japan
- Dr. Wang, Linbo: President, Life Science Research Institute Co., Ltd Venture Company of University of Tsukuba, Japan
- Dr. Wang, Qian: Postdoctoral Researcher, Ocean University of China, China
- Dr. Yabar, Mostacero Helmut Friedrich: Associate Professor, University of Tsukuba, Japan
- Mr. Yasuda, Tadashi: President, Yasuda Co., Ltd, Ibaraki, Japan
- Dr. Yamaji, Keiko: Professor, University of Tsukuba, Japan
- Dr. Yang, Shengjiong: Associate Professor, Xi'an University of Architecture and Technology, China
- Dr. Yang, Xiaojing: Lecturer, Guangdong University of Technology, China
- Dr. Yuan, Tian: Assistant Professor, University of Tsukuba, Japan
- Dr. Zhao, Yingxin: Professor, Tianjin University, China
- Dr. Zhao, Ziwen: Associate Researcher, South China Institute of Environmental Sciences, Ministry of Ecology and Environment of the People's Republic of China

Scientific Committee

- Dr. Abubakar, Laila: Professor, Technical University of Mombasa, Kenya
- Dr. Adani, Fabrizio: Professor, University of Milan, Italy
- Dr. Baltrusaitis, Jonas: Associate Professor, Lehigh University, USA
- Dr. Bux, Faizal: Professor, Durban University of Technology, South Africa
- Dr. Chen, Lyujun: Professor, Tsinghua University, China
- Dr. Chen, Rongzhi: Professor, University of Chinese Academy of Sciences, China
- Dr. Chang, Jo-Shu: Professor, Tunghai University, Taiwan

- Dr. Dong, Cheng-Di, Professor, National Kaohsiung University of Science and Technology, Taiwan
- Dr. Feng, Chuanping: Professor, China University of Geosciences (Beijing), China
- Dr. Fu, Guangtao: Professor, University of Exeter, UK
- Dr. Gu, Ji-Dong: Professor, Guangdong Technion Israel Institute of Technology, China
- Dr. Guo, Wenshan: Professor, University of Technology Sydney, Australia
- Dr. Khanal, Samir Kumar: Professor, University of Hawaii-Manoa, USA
- Dr. He, Pinjing: Professor, Tongji University, China
- Dr. Higgins, Brenda: Associate Professor, Auburn University, USA
- Dr. Hsieh, Shuchen: Professor, National Sun Yat-sen University, Taiwan
- Dr. Kim, Sang-Hyoun: Professor, Yonsei University, Korea
- Dr. Li, Fengting: Professor, Tongji University, China
- Dr. Li, Xiaoyan: Professor, The University of Hong Kong/Tsinghua University, China
- Dr. Li, Yongmei: Professor, Tongji University, China
- Dr. Lin, Bin-Le: Professor, National Institute of Advanced Industrial Science and Technology (AIST), Japan
- Dr. Lin, Lin: Associate Professor, Tsinghua University, China
- Dr. Lin, Yuemei: Associate Professor, Delft University of Technology, The Netherlands
- Dr. Liu, Rui: Professor, Yangtze Delta Region Institute of Tsinghua University, Zhejiang, China
- Dr. Liu, Yu: Professor, Nankai University, China
- Dr. Lyu, Fan: Professor, Tongji University, China
- Dr. Ngo, Huu Hao: Professor, University of Technology Sydney, Australia
- Dr. Pandey, Ashok: Professor, CSIR-Indian Institute of Toxicology Research, India
- Dr. Park, Chul: Professor, University of Massachusetts Amherst, USA
- Dr. van Loosdrecht, Mark C.M.: Professor, Delft University of Technology, The Netherlands

- Dr. Show, Kuan-Yeow: Professor, Puritek Research Institute, Puritek Co. Ltd., Nanjing, China
- Dr. Swaleh, Mariam: Technical University of Mombasa, Kenya
- Dr. Tang, Yue-Qin: Professor, Sichuan University, China
- Dr. Tong, Yen Wah: Professor, National University of Singapore, Singapore
- Dr. Wan, Caixia "Ellen": Professor, University of Missouri, USA
- Dr. Wang, Hongtao: Professor, Tongji University, China
- Dr. Wang, Ying, Professor, Tongji University, China
- Dr. Wang, Zhiwei, Professor, Tongji University, China
- Dr. Wen, Donghui: Professor, Peking University, China
- Dr. Xiao, Feng: Professor, North China Electric Power University, China
- Dr. Xu, Fuqing: Professor, Xi'an Jiaotong University, China
- Dr. Xu, Qiyong: Associate Professor, Peking University, China
- Dr. Xu, Suyun: Associate Professor, Shanghai University of Science and Technology, China
- Dr. Yu, Hanqing: Professor, University of Science and Technology of China, China
- Dr. Zhan, Xinmin: Professor, National University of Ireland Galway, Ireland
- Dr. Zhang, Xiaoyuan: Associate Professor, Nankai University, China
- Dr. Zhang, Yi: Associate Professor, Fudan University, China
- Dr. Zhou, Jianpeng, Professor, Southern Illinois University Edwardsville, USA

Secretariat

- Dr. Chen, Xingyu: Postdoctoral Researcher, City University of Hong Kong, China
- Dr. Wang, Jixiang: Engineer, Shanghai Academy of Environmental Sciences, China
- Dr. Zhao, Yankai: Research Associate, University of Tsukuba, Japan

International Conference on Bioprocess and Sustainability 2025 (ICBS 2025)

14th – 18th November 2025

International Conference Halls, Kyoto University's Clock Tower, Kyoto, Japan

Venue	Hall 1	Hall 2	Hall 3
2025. 11. 14		14th November 2025 (Fri.)	
Time (JST)	Program	Program	Program
13:00 - 18:00	International Confer	Onsite Registration ence Halls, Kyoto University's Clock Tower,	Kyoto, Japan
2025. 11. 15		15th November 2025 (Sat.)	
9:00 - 9:30	Onsite Registration International Conference Halls, Kyoto University's Clock Tower, Kyoto, Japan		
9:30 - 10:00	Opening Ceremony Prof. Ryozo Noguchi (Kyoto University, Japan) Prof. Duu-Jong Lee (Chairman of ISBS, City University of Hong Kong, China)		
	Plenary Speech Chair: Prof. Duu-Jong Lee (City University of Hong Kong, China)		
10:00 - 11:00	K1 Development of Aerobic Granular Sludge processes Prof. Mark C.M. van Loosdrecht, Delft University of Technology, The Netherlands		Online Synchronization
	Keynote Speech Chairs: Profs. Taira Hidaka (Kyoto University, Japan) and Fabrizio Adani (University of Milan, Italy)		
11:00 – 11:30	K12 - Harnessing Algae for Enhanced Performance in Membrane Rioreactors		

11:30 - 12:00	K6 Microalgae-driven Negative Carbon and CO ₂ to X Technologies Prof. Jo-Shu Chang, Tunghai University, Taiwan	
12:00 - 13:00	Lunch Break	
	Keynote Speech	Keynote Speech
	Chairs: Profs. Yu Liu (Nankai University, China)	Chairs: Profs. Brendan T. Higgins (Auburn
	and Shuchen Hsieh (National Sun Yat-sen University,	University, USA) and Yue-Qin Tang (Sichuan
	Taiwan)	University, China)
13:00 - 13:30	K-17 Facultative Sulfide-Oxidizing Heterotrophic	K-22 Integrated Resource Recovery from
	Denitrification for Enhanced Nitrogen and Sulfide	Food Waste: Biogas Generation and Carbon
	Removal	Source Production
	Prof. Duu-Jong Lee, City University of Hong Kong,	Prof. Qiyong Xu, Peking University, China
	China	
13:30 - 14:00	K-8 Microbial Granulation and Lessons from	K-19 Substrate Dependent Response to
	Oxygenic Photogranules (OPGs)	Exogenous CO ₂ Injection in Anaerobic
		Digestion
	Prof. Chul Park, University of Massachusetts	Prof. Suyun Xu, University of Shanghai for
	Amherst, USA	Science and Technology, China
14:00 - 14:30	K-21- Towards Controlling the Microbial	K-24 Mechanistic Insights into the Role of
	Community	Tannic Acid-modified Iron-biochar
		Composites for Enhanced Methane
	Prof. Masanori Toyofuku, University of Tsukuba,	Production in Anaerobic Process
	Japan	Prof. Xiaoyuan Zhang, Nankai University, China
	Oral Presentation	Oral Presentation
	Chairs: Profs. Fan Lyu (Tongji University) and Shu-	Chairs: Profs. Yen Wah Tong (National
	Yuan Pan (National Taiwan University)	University of Singapore, Singapore) and Fuqing
		Xu (Xi'an Jiaotong University, China)
14:30 - 14:40	O-A-2 Performance of a Pilot-scale Sand Moving	O-F-5 Organic carbon-equivalent inputs in
	Bed Biofilm Reactor for Nitrogen Removal in a	paddies: Impacts on GHG reduction, rice
	Seawater Recirculating Aquaculture System	productivity, and soil health
	Prof. Weiwei Huang, Hainan University, China	Prof. Xian Xiao, Changzhou University, China

14:40-14:50 O-A-16 Multidimensional Insights into the Impact	O-F-3 Biochar Preparation and Carbon	
Mechanisms of Toxicant Stress on Anammox	Sequestration and Emission Reduction	
System	Technologies in Paddy Fields	
Prof. Yingxin Zhao, Tianjin University, China	Prof. Yuhu Zhang, Capital Normal University,	
	China	
14:50 - 15:00 O-B-10 Basic Research on Hydrogen Generation	O-E-1 Algal-bacterial Granule System	
Using Cow Dung and Livestock Waste	Achieves Negative Non-CO ₂ Greenhouse Gas	
	Emissions by Off-gas Circulation	
Prof. Toshihiko Otsuka, Toyo University, Japan	Dr. Jixiang Wang, Shanghai Academy of	
	Environmental Sciences, China	
15:00 - 15:10 O-A-17 Delineation of Microbial Nitrogen-	O-F-4 Assessing the Impact of Spent Coffee	
metabolic Network in an Anammox Driven Full-	Grounds Compost on Reducing Greenhouse	
scale Wastewater Treatment Plant	Gas Emissions and Improving Soil Carbon in	
Prof. Ji-Dong Gu, Guangdong Technion Israel	Short-Cycle Crop Production.	
Institute of Technology, China	Dr. Chengchun He, National Taiwan University,	
	Taiwan	
15:10 – 15:20 O-A-6 Biogas-Driven Denitrification Efficiency	O-E-2 Microalgae-Driven Optimization of	
and Mechanisms in Membrane Biofilm Reactors	Algal-Bacterial Granular Sludge for Saline	
Prof. Lei Zhao, Harbin Institute of Technology,	Aquaculture Wastewater Remediation	
China	Dr. Qian Wang, Ocean University of China,	
	China	
15:20-15:30 O-A-5 Partial Nitritation and Anammox for Saline	O-H-5 Green Design for Low-carbon	
Sewage Treatment	Ethylene Production via Electrochemical	
Prof. Xiaowu Huang, Guangdong Technion-Israel	Carbon Dioxide Reduction	
Institute of Technology, China	Mr. Suraj Negi, National Taiwan University,	
	Taiwan	
15:30 – 16:00 Official	Group Photo* and Poster Preparation	on
16:00 – 17:30 Dinner Pre	paration	Poster Presentation
17:30 - 18:00	Break	

18:00 - 20:00	Dinner I	Party	
20:00 - 21:00	Venue Setup		
2025. 11. 16		16th November 2025 (Sun)	
9:00 - 9:30	I. A 1 C f	Onsite Registration	Zarana Wasaka Ilanan
		Halls, Kyoto University's Clock T	
	Keynote Speech and Oral Presentation Chairs: Profs. Wenshan Guo (University of	Keynote Speech and Oral Presentation Chairs: Profs. Jo-Shu Chang (Tunghai	Keynote Speech and Oral Presentation Chairs: Profs. Caixia "Ellen" Wan
	Technology Sydney, Australia) and Weiwei Huang (Hainan University, China)	University, Taiwan) and Xiaoyong Qian (Shanghai Academy of Environmental Sciences, China)	(University of Missouri, USA) and Qiyong Xu (Peking University, China)
	K-25 Scaling up of Polyhydroxyalkanoates (PHA) Production from Toxic feedstock: Influence of Operational modes Prof. Yi Zhang, Fudan University, China	K-13 Cultivation of Microalgae on Thermal Hydrolysate from Rendering of Poultry Dissolved Air Flotation (DAF) Solids Prof. Brendan T. Higgins, Auburn University, USA	K-20 Upcycling of Food Waste Digestate into Solid Fertilizer with Biochar and Encapsulation Prof. Yen Wah Tong, National University of Singapore, Singapore
	K-7 Integrating Biochar and Advanced Oxidation for Effective Removal of Emerging Contaminants from Waste Activated Sludge Prof. Cheng-Di Dong, National Kaohsiung University of Science and Technology, Taiwan	K-11 Resource and Energy Recovery from Wastewater and Organic Waste Using Anaerobic Digestion with Sunlight-Driven Phototrophic Microorganisms Prof. Taira Hidaka, Kyoto University, Japan	K-3 Renewable Fertilizers from Anaerobic Digestion Promoting Circular Economy in Agriculture Prof. Fabrizio Adani, University of Milan, Italy
10:30 - 10:40	O-A-4 Development and Application of a Three- Loop Recirculating Freshwater Aquaculture	O-H-1 Surface Confinement Boosts the Insitu Formation of Peroxydisulfate Metastable	K18 Structure of Phage Communities and Their Interaction with Prokaryotic
	System Prof. Fei Yang, Hainan University, China	Complexes on Assembled Hollow N-rich Carbon Plates for Water Purification Prof. Rongzhi Chen, University of Chinese Academy of Sciences, China	Microbiome in Anaerobic Digesters Prof. Yue-Qin Tang, Sichuan University, China

FeCu-Lychee Wood-Derived Carbon Dot Punctionalized Biochar from Agricultural Waste Prof. Shuchen Hsich, National Sun Yat-sem University, Taiwan 10:50 – 11:00 0-6-5 Combined Exposure to Polyethylene Microplastics and Elevated Seawater Temperature Induces Oxidative Imbalance and Histopathological Damage in Coral Briareum Violacea Prof. Yongmei Li, Tongji University of Science and Technology, Taiwan 11:00 – 11:10 0-11-9 A Chemical-biological Process Based on Hs.03/01 Jaysi and Cryptic Growth for in-situ Reduction of Waste Activated Sludge Dr. Zhu Liang, Tsinghua University, China 11:10 – 11:20 0-6-5 Cultivation of Protein-rich Microalgae Using Swine Wastewater in Pilot-scale Study and Development of Microalgae-based Animal Feed Dr. Hui Liu, Shanghai Academy of Environmental Sciences, China Dr. Jingnan Li, Kyoto University, Japan Dr. Jingnan Li, Kyoto University, Japan Dr. Jingnan Li, Kyoto University, Japan Li, Kyoto University, Lina Li, Li, Lina Lina Lina Lina Lina Lina Lina Lina Lin	10.40 - 10.50	O-C-1 Sustainable Antioxidant Platform Based on	O-B-1 Mechanistic Insights into C-S-Fe-P	
Functionalized Biochar from Agricultural Waste Prof. Shuchen Hsieh, National Sun Yat-sen University, Taiwan 10:50 – 11:00 O-G-5 Combined Exposure to Polyethylene Microplastics and Elevated Seawater Temperature Induces Oxidative Imbalance and Histopathological Damage in Coral Briareum Violacea Prof. Ya-Ting Chen, National Kaohsiung University of Science and Technology, Taiwan 11:00 – 11:10 O-H-9 A Chemical-biological Process Based on HzOz/Oz Lysis and Cryptic Growth for in-situ Reduction of Waste Activated Sludge Dr. Zhu Liang, Tsinghua University, China 11:10 – 11:20 O-C-5 Cultivation of Protein-rich Microalgae Using Swine Wastewater in Pilot-scale Study and Development of Microalgae-based Animal Feed Dr. Hui Liu, Shanghai Academy of Environmental Sciences, China 11:20 – 11:30 O-A-15 Co-cultivation of Cyclotella and a Filamentous Fungus for Effective Treatment of Palm Oil Mill Effluent Dr. Jingnan Li, Kyoto University, Japan Financia Sudge with Sulfur-containing Biomass Prof. Yongmei Li, Tongji University, China O-B-3 Growing Duckweed in Swine Wastewater and its Conversion to Biofuel Dr. Weihua Cui, China University of Geosciences (Beijing), China O-G-5 Growing Duckweed in Swine Wastewater and its Conversion to Biofuel Dr. Wichina University of Geosciences (Beijing), China O-G-11-A pplication of GOx-based Enzymatic Biolaching for Co and Ni Recovery from Shateries Ms. Anusha Vishwakarma, Indian Institute of Technology Patna, India D-C-8 Nutrients Recovery and Functional Biomaterials Production by Hydrothermal Treatment of Algal-bacterial Granular Sludge Ms. Rammuni Silva, University of Tsukuba, Japan O-B-11 Comparative Evaluation of Hydrothermal Treatment of Palm Oil Mill Effluent Dr. Jingnan Li, Kyoto University, Japan O-B-11 Comparative Evaluation of O-D-1 Regulating the Carbon-to-Nitrogen Ratio for Enhanced Reconstruction Efficiency in Litopenaeus vannamei Aquaculture Systems Prof. Pengfei Cheng, Ningbo University, China	10.40 10.50

8:30 - 17:00	Field survey 1-Yuge Farm	
2025. 11. 18	**18th November 2025 (Tue)	
9:00 - 18:00	Field survey 2-Experimental Farm of Graduate School of Agriculture, Kyoto University	

Notes: * Nov. 15, 4:00 pm: Group photo for all participants in front of the Clock Tower.

^{**} Field surveys during Nov. 17-18 only for applicable participants.

List of Posters and Their Exhibition Time Slots

Time: <u>15:30-17:30</u>, <u>15th November 2025</u>

Venue: Hall 3, International Conferences, Kyoto University's Clock Tower,

Kyoto, Japan

Theme I: Biological waste/wastewater treatment

P-A-1 - Effect of pH on the Performance of a Simultaneous Methanogenesis-Feammox-denitrification System Treating Aquaculture Wastewater

OBiao Zhang, Qing Xia, Jun Cheng, Fei Yang, Xuesong Yi, Weiwei Huang*

P-A-2 - Preparation of Gel Granular Sludge and Its Application in Marine Aquaculture Wastewater Treatment

○Yongjie Liu, Weiwei Huang*

P-A-3 - Impact of Fe(III)/N Ratio on Organic Matter and Nitrogen Removal in Integrated Anaerobic Systems Treating Aquaculture Wastewater

○Qingzhen Qiu, Qing Xia, Weiwei Huang*

- P-A-4 Seasonal Dynamics of Microcystin Degrading Bacteria and Degradation Ability in Natural Lake OSaki Uchida, Huyen Thi Khanh Nguyen, Lin Thida, Qintong Li, Kazuya Shimizu, Motoo Utsumi*
- P-A-5 Exploring Sulfur Uptake by Cyanobacteria under Varying Nutrient Conditions in Sulfur-containing Wastewater

○Jihan Sun, Tian Yuan*, Zhongfang Lei, Zhenya Zhang*

P-A-6 - Microbial Colonization and Succession on Polylactic Acid Microplastics (PLA MPs) in Mangrove Forests - the Role of Environmental Conditions and Plastic Properties

○Xueyi Song, Yini Ma*

- P-A-7 Optimizing Vanadium(V) Removal in Groundwater with Machine Learning Predictions ○Liting Hao*, Miao Li*
- P-A-8 Potentials of Electrochemical-sulfate Reducing Bacteria (SRB) Hybrid Systems for Heavy Metals Removal from Wastewater

○Po-Chun Yang

P-A-9 - Antibiotic Characterization in Livestock and Aquaculture Wastewater via Excitation-emission Matrix Fluorescence Spectroscopy: Current Challenges and Future Perspectives

○Leilei He, Wei Zheng, Rui Liu*, Lujun Chen

P-A-10 - Functions of Complex Carbon Sources in Granular Sludge Formation: Granule Development, EPS Excretion and Microbial Community: A Mini Review

OLi Wen Liew, Ziyin Ai, Jian Dong, Yuechong Fan, Tian Yuan, Zhongfang Lei*

P-A-11 - Shifting Nitrogen Pathways toward Nitrogen Assimilation with Enhanced Protein Production in Activated Sludge via Nitrification Suppression

O Yuechong Fan, Ziyin Ai, Li Wen Liew, Tian Yuan, Zhongfang Lei*

P-A-12 - Beyond Filter Cake Filtration: New Insights into Secondary Dewatering of Drinking Water Centrifuge Sludge Through Cell Lysis and Release of Bound Water

P-A-13 - Synthesis and Characterization of High-porosity Polyurethane Foam for Immobilization of Nitrifying Bacteria in Wastewater Treatment

○Chengyu Jiang, Tian Yuan*, Baoqi Gao, Zhenya Zhang*, Zhongfang Lei

P-A-14 - Microbial Immobilization on PVA/LDH Composites for Enhanced Nitrogen Removal from Aquaculture Wastewater

○Baoqi Gao, Tian Yuan*, Zhenya Zhang*, Zhongfang Lei

P-A-15 - Structural Extracellular Polymer-sodium Alginate Immobilized Aerobic Denitrifying Bacteria for the Treatment of Nitrogen-containing Wastewater

○Zhihao Chen, Dongfang Liu, Wenli Huang*

P-A-16 - Recirculating Aquaculture Systems with Efficient Aquaculture Wastewater Treatments under Low Ammonia Loading: A Case Study on *Litopenaeus vannamei* Farming

°Yuanyuan Zhang, Yankai Zhao, Tian Yuan*, Zhenya Zhang, Guohua Cao, Yanfei Cheng, Akio Shoji

Theme II: Bioenergy and Resource Recovery

P-B-1 - Selective Enhancement of Methane Production and Phosphorus Recovery by Mg-Fe Layered Double Hydroxides in Anaerobic Digestion of Food Waste

OYiming Shen, Yi Liu, Tian Yuan*, Zhenya Zhang, Zhongfang Lei

P-B-2 - Fertilizer Potential of Solid Digestate from a High-solid Anaerobic Digestion System with Liquid and Biogas Recirculation

OJize Yang, Wenbo Gu, Yuxiao Li, Baibing Li, Zhongfang Lei, Zhenya Zhang, Tian Yuan*

- P-B-3 An Integrated System of Anaerobic Digestion and Recirculating Aquaculture for Sustainable Shrimp Farming
 - O Yanfei Cheng*, Zhenya Zhang, Akio Shoji, Tian Yuan, Yugo Arisaka, Kendo Iida, Ayaka Ishizawa, Yankai Zhao
- P-B-4 Effects of Liquid Digestate from Different Types of Food Waste as Fertilizer on the Growth of Hydroponic Lettuce

○Yun Luo, Tian Yuan*, Jing Xu, Zhongfang Lei, Zhenya Zhang

- P-B-5 Permeability Test in Dry Methane Fermentation
 - OYugo Arisaka*, Yanfei Cheng, Zhenya Zhang, Akio Shoji, Akira Umezu, Yankai Zhao
- P-B-6 Controlling Factors on the Co-recovery of Structural Extracellular Polymeric Substances and Volatile Fatty Acids from Anaerobic Fermentation of Food Waste

ORungen Zeng, Zhongfang Lei, Chen Shi, Zhenya Zhang, Kazuya Shimizu, Tian Yuan*

P-B-7 - Enhanced Biogas Production from High-solid Anaerobic Digestion of Rice Husk by Adding Air Nanobubble Water

○Baibing Li, Wenbo Gu, Yuxiao Li, Jize Yang, Zhongfang Lei, Zhenya Zhang, Tian Yuan*

- P-B-8 Integrating Heterotrophic Nitrification and Algal Assimilation in A High-solid Anaerobic Digestion System with Liquid Recirculation for Methane Enhancement and Nitrogen Recovery

 Yuxiao Li, Wenbo Gu, Baoqi Gao, Zhuo Xie, Baibing Li, Jize Yang, Zhongfang Lei, Zhenya Zhang, Tian Yuan*
- P-B-9 Effect of Applied Voltage Level and Timing on Methane Production in A Microbial Electrolysis Cell-assisted Anaerobic Digestion System Treating Pig Manure

∘Yi Liu, Tian Yuan*, Zhenya Zhang*, Zhongfang Lei

P-B-10 - Coupled Fouling Dynamics of Particulates and Dissolved Organic Matter in Digestate Treatment: Insights from Real-time Optical Coherence Tomography

∘ *Qiyong Xu*, Yuxin Qu*

P-B-11 - The study on the Mechanisms Underlying the Enhancement of Anaerobic Digestion of High-lipid Substrates through the Regulation of Unsaturated Fatty Acid Degradation via ECI Enzymes

oJinku Liu, Chenxi Li*

Theme III: Biomass Reclamation and Utilization

P-C-1 - Modified Biochar Mitigates Nitrogen Loss in Distilled Grain Waste Composting by Modulating Microbial Community Assembly and Function

○ Zhao-Yong Sun*, Yang Xu, Shi-Peng Wang, Yue-Qin Tang

- P-C-2 Utilization of Concrete Wash Water (CWW) for Enhanced Microalgae Cultivation

 Guoran Liu, Tian Yuan*, Zhongfang Lei, Zhenya Zhang*, Yanfei Cheng, Akio Shoji
- P-C-3 Regulatory Mechanism of Haa1p and Hap4p in *Saccharomyces cerevisiae* to Mixed Acetic Acid and Formic Acid When Fermenting Mixed Glucose and Xylose

○Xinyu Xiao, Yue-Qin Tang*

- P-C-4 Use of Waste Algal-bacterial Granular Sludge as Potential Soil Amendments
 - ○Han Shao, Xinyu Lyu, Tian Yuan, Zhongfang Lei*
- P-C-5 Biostimulating Effect of Dissolved Organic Matter (DOM) in Anaerobic Digestate on Hydroponic Cultivation

○Wanqing Hu, Tian Yuan*, Zhongfang Lei, Zhenya Zhang

P-C-6 - Fermenting Fruit Peel Waste Substrates with *Bacillus subtilis* for Growth Performance of Black Soldier Fly Larvae, *Hermetia illucens* (LINNAEUS) in CEBU City

○Vince Marc G. Padao*, Paul John L. Geraldino

P-C-7 - Ultrasound Assisted Freezing Pretreatment and Isomalto-oligosaccharides for Enhancing Maceration Efficiency, Quality, and Volatile Metabolites of Japanese Apricot Syrup

ODan Cheng, Ximeng Lin, Hongliang Wu, Yike Wang, Aoting Li, Chengdong Ma, Pengyu Zhou, Xiao Huang, Yuying Lu, Fanfan Liu, Liping Tong, Zhaojun Ni, Zhihong Gao*, Ting Shi*

Theme IV: Biosystems and Bioassay

- P-D-1 Effects and Solutions of Carbon Dioxide on Fish in Recirculating Aquaculture Systems

 Shengnan Cang, Xinglan Lv, Xin Hu, Guozhi Luo*
- P-D-2 Effect of Dissolved Inorganic Carbon on Hydroponic Lettuce Growth

 OJunqi Yan, Jing Xu, Tian Yuan*, Yun Luo, Yi Liu, Zhongfang Lei, Zhenya Zhang
- P-D-3 Comparison of the Environmental Impact of Hydroponic Cultivation and Conventional Cultivation of Soybeans

○Ayana Ito*, Ryozo Noguchi, Reo Kageyama

P-D-4 - Evaluation of The Growth Performance and 16s Metabarcoding Analysis of The Cecal Gut Bacteria in Broiler Chickens Under A *Bacillus Subtilis* (Atcc 6051)-Fermented *Halymenia Durvillei* Bory De Saint Vincent (Rhodophyta) Supplemented Feeds Diet

○Clint Daryll C. Suarez*, Paul John L. Geraldino

Theme V: Microalgal-bacterial Consortium and Its Advancements

- P-E-1 Nitrogen Metabolism May Control Phosphorus Fate and Recovery in Algal-bacterial Granular Sludge-based Wastewater Treatment System
 - ○Xinyu Lyu, Xi Zhao, Han Shao, Zhichen Li, Tian Yuan, Motoo Utsumi, Zhongfang Lei*
- P-E-2 Preliminary Examination of Resilience and Resource Recovery of Algal-bacterial Granular Sludge from Extreme Acidic and Alkaline Wastewaters
 - ∘ Ge Gao, Ziyin Ai, Xingyu Chen, Wenjun Liu, Zhongfang Lei*, Tian Yuan, Motoo Utsumi, Kazuya Shimizu, Duu-Jong Lee
- P-E-3 Distinct Phosphorus Speciation and Distribution in Algal-bacterial Aerobic Granular Sludge-based Wastewater Treatment Systems Under Different Nitrogen Conversion Pathways
 - ○Xinyu Lyu, Xi Zhao, Han Shao, Zhichen Li, Tian Yuan, Motoo Utsumi, Zhongfang Lei*
- P-E-4 Shrimp Aquaculture Wastewater Treatment in a Continuous-flow Algal-bacterial Granular Sludge Bioreactor: Effects of Light and Stocking Density on Performance and Resource Recovery
 OJian Dong, Wenjun Liu, Li Wen Liew, Yunqiang Fan, Sicheng Zhang, Tian Yuan, Motoo Utsumi, Zhongfang Lei*
- P-E-5 Phosphorus Accumulation Performance and Recoverability of Algal-bacterial Granular Sludge under Low Light Conditions
 - °Sicheng Zhang, Yihao Huang, Jian Dong, Tian Yuan, Motoo Utsumi, Zhongfang Lei*
- P-E-6 Enhanced Phosphorus Removal by Algal-bacterial Granular Sludge System Coupling pH Control with Acetic Acid: Closed-loop Resource Management in Recirculating Aquaculture System

 Wenjun Liu, Jian Dong, Ziyin Ai, Ge Gao, Tian Yuan, Motoo Utsumi, Zhongfang Lei*
- P-E-7 Nitrogen Assimilation May Facilitate Enhanced Nitrogen Removal and Reservation in Algalbacterial Granular Sludge
 - OZiyin Ai, Yuechong Fan, Jian Dong, Xinyu Lyu, Weiwei Huang, Tian Yuan, Motoo Utsumi, Zhongfang Lei*
- P-E-8 Preliminary Analysis of Nutrients Reclamation from Waste Algal-bacterial Granule Sludge for Komatsuna Farming
 - ○Xi Zhao, Xinyu Lyu, Zhongfang Lei*
- P-E-9 Algal and Bacterial Extracellular Polymeric Substances (EPS): Similarities, Differences, and Synergistic Prospects for Environmental Remediation A Review
 - ○Zhuo Xie, Tian Yuan*, Zhongfang Lei, Zhenya Zhang*
- P-E-10 Evaluation and Comparison of Shrimp Farming Wastewater Treatment Using Bacterial and Algalbacterial Granular Sludges in the Context of Vietnam
 - ○Vu Thi Kieu Loan, Yunqiang Fan, Zhongfang Lei*, Tian Yuan, Yabar Helmut
- P-E-11 Self-sufficiency of Carbon Source in Bacterial and Algal-bacterial Granular Sludge-based Wastewater Treatment Systems Coupling with Anaerobic Fermentation of Waste Granular Sludge

 Orangiang Fan, Zhichen Li, Vu Thi Kieu Loan, Jian Dong, Zhongfang Lei*, Tian Yuan, Motoo Utsumi
- P-E-12 A Mini Review on Algal-bacterial Aerobic Granular Sludge for Emerging Pollutants Removal

 Sizhou Liang, Zhongfang Lei*, Weiguo Zhang*
- P-E-13 Tidal Fluctuation of Dissolved Oxygen in Algal-bacterial Granular Sludge: Visualizing O₂
 Penetration and Distribution under Different Oxygenation Strategies

 Ozhichen Li, Qian Wang, Xinyu Lyu, Zhongfang Lei*, Tian Yuan, Motoo Utsumi, Chul Park, Duu-Jong Lee, Mark

Theme VI: Greenhouse gases emission/mitigation and carbon/nitrogen neutrality

P-F-1 - Functionalized Carbon Nanotubes Catalysts Achieve Efficient CO2 Conversion

∘Zichen Li, Fengting Li*

P-F-2 - Comprehensive Evaluation of GHG Impacts and Eco-environmental Benefits of Rice Straw Dry Anaerobic Fermentation in Yangtze River Delta Paddy Fields

○Hongchang Zhang*, Min Zhang, Shuangqing Hu

P-F-3 - The Carbon and Nitrogen Footprint in Application of Algal-bacterial Granular Sludge Technology to Municipal Wastewater Treatment

○Kyosuke Higa, Bin-le Lin*, Kazuya Inoue, Zhongfang Lei*

P-F-4 - How Can ASEAN Countries Move to Low-carbon Development Pathways

OShasha Tian, Gengyu Gao, Yihui Ding, Xia Li, Fengting Li*

P-F-5 - High Light Intensity and Transmittance Enhances C4 and CAM Pathways for CO₂ Concentrating in Attached Chlorella: Proteomic Insights into Regulatory Mechanisms

○ Yaoqi Hou, Weiwei Huang, Chunfeng Song*

P-F-6 - Research on the Impact of Industrial Digitalization on Emission Reduction in Guangdong Province from a Sectoral Perspective

○Jiao Jingren*, Helmut Yabar

- P-F-7 Role of Extracellular Polymeric Substances in Enhancing High Bicarbonate Tolerance in CO₂
 Absorption-microalgae Conversion System via Attached Cultivation: A Metabolomic Perspective

 Yaoqi Hou, Weiwei Huang, Chunfeng Song*
- P-F-8 Optimizing Light Intensity Strategies in CO₂ Absorption-microalgae Conversion System: Towards Efficient Carbon Utilization and Sustainable Protein Biorefining

○ Yaoqi Hou, Yizhen Wei, Dantong Wang, Zhan Hu, Yutaka Kitamura, Chunfeng Song*

P-F-9 - Transcriptomics Reveals Enhanced Carbon Fixation Mechanism in CO₂ Absorption-microalgae Conversion System under Batch Feeding Mode

○Yaoqi Hou, Weiwei Mao, Chunfeng Song*

Theme VII: Sustainable Management and Analysis

P-G-1 – Digital Development of China's Ecological Environment Is Needed under the Coordinated Landscape

○Jiangyi Yan, Yihui Ding, Fengting Li*

P-G-2 – Large-scale Sustainable Utilization of Bauxite Slag (Red Mud): Properties, Hazards and Recycling Perspectives

○ Tingting Song, Fengting Li*

P-G-3 – The Influence of Human Activities on Water Quality Changes in the Taihu Basin: A Study on Management Strategy Optimization

OXianfeng Yang, Yabar Mostacero Helmut Friedrich*

P-G-4 – Coastal Saltmarsh Sustainability Governance: Multilevel Social Ecological Networks for

Theme VIII: Biogeochemistry and flocculation in water

P-H-1 - Coagulant Selection and Multimodal Process Design for High Turbidity Raw Water Treatment: A Multi-scale Experimental Study

○Weijie Wang, Junsen Wang, Hongtao Wang*

- P-H-2 Effect of Turbulent Flow on the Aggregation Kinetics of Polystyrene Colloidal Particles

 OJing Gao, Motovoshi Kobayashi*, Takuya Sugimoto
- P-H-3 Research on Enhanced Sludge Dewatering by Electrolysis Coupled with Peracetic Acid in a Pyrite-based Three-dimensional Electrode System

○Junsen Wang, Mengfei Yao, Weijie Wang, Hongtao Wang*

P-H-4 - Microbial Response to Different Types of Shear Force in Granulation of Flocculent Activated Sludge

○Taiki Umebayashi, Zhichen Li, Zhongfang Lei*

P-H-5 - Unlocking Centrifugal Sludge Secondary Dewatering via Organic Polymer Flocculants: Macropores Expansion and Drainage Networks

∘Yu Wang, Na Liu, Misha Liu, Chenwei Yuan, Fajiao Zou, Jiaxin Han, Canxuan Fan, Fengting Li, Jie Li*

- P-H-6 Flocculation of Anaerobic Digestate for Enhanced Microalgae Cultivation and Nutrient Recovery

 Yuxuan Yang, Tian Yuan*, Zhongfang Lei, Zhenya Zhang*
- P-H-7 Lignin-based Barrier Breaking Caused Supernatant Deterioration: A Molecular-level Characterization of DOM for Exploration of Sludge-flocculant Interfacial Processes

 Chenwei Yuan, Fajiao Zou, Misha Liu, Yu Wang, Na Liu, Jiaxin Han, Canxuan Fan, Fengting Li, Jie Li*

Theme IX: Other Systems or Conversions Relating to Sustainability

P-I-1 – High-Efficiency Extraction of Al and SiO₂ from High-alumina Coal Fly Ash via Na₂CO₃ Roasting Activation and HCl Leaching

○Xueting Bai, Fengting Li*

- P-I-2 Protective Effects of Sargassum Crassifolium Extract Against Oxidative Stress Induced by Coexposure to Polystyrene Nanoplastics and Cadmium in Clone 9 Cells
 - ○Ting-Yu Chang, Ya-Ting Chen, Chun-Yung Huang, Cheng-Di Dong, Chiu-Wen Chen, Shu-Ling Hsieh*
- P-I-3 Efficient Adsorption Removal of Phosphate from Aquaculture Effluent by Waste Eggshell-modified Peanut Shell Biochar Microspheres Adsorbent Materials

○Cancan Xu, Rui Liu*, Peng Zhang

P-I-4 – Sustainable Purification Strategies for Carbon Nanotubes: Tailoring Methods to SWCNT/MWCNT Structures and Impurities

OZiving Wu, Fengting Li*

P-I-5 - Gram-scale Ammonia Synthesis via Electrochemical Nitrate Reduction Using Enzyme-inspired Dual-atomic Cu Catalyst

Oingshuo Li, Yahui Li, Bincheng Xu, Jianping Yang, Ying Wang*

P-I-6 – CNTs with Encapsulated Co₃O₄ and MnO₂: Elucidating the Synergism of Nanoconfinement and Bimetallic Oxides in Activating Peroxymonosulfate for Water Decontamination

P-I-7 - Synthesis of COF-MOF Bilayer Membrane at Room Temperature for Efficient Recovery of Lithium Ions

○Wuyue Geng, Furong Ji, Joseph Tinega, Jie Li, Fengting Li*

Clock Tower Centennial Hall (Kyoto University)

International Society of Bioprocess and Sustainability 国際バイオプロセス・サステイナビソティ学会
